Zawtar al-Gharbiya and al-Sharqiya

WESTERN TOWN | 20 July 2026

EASTERN TOWN | 20 July 2026

Two neighbouring towns on the same date. These are separate locations, not a before-and-after pair. Dates follow the article captions.

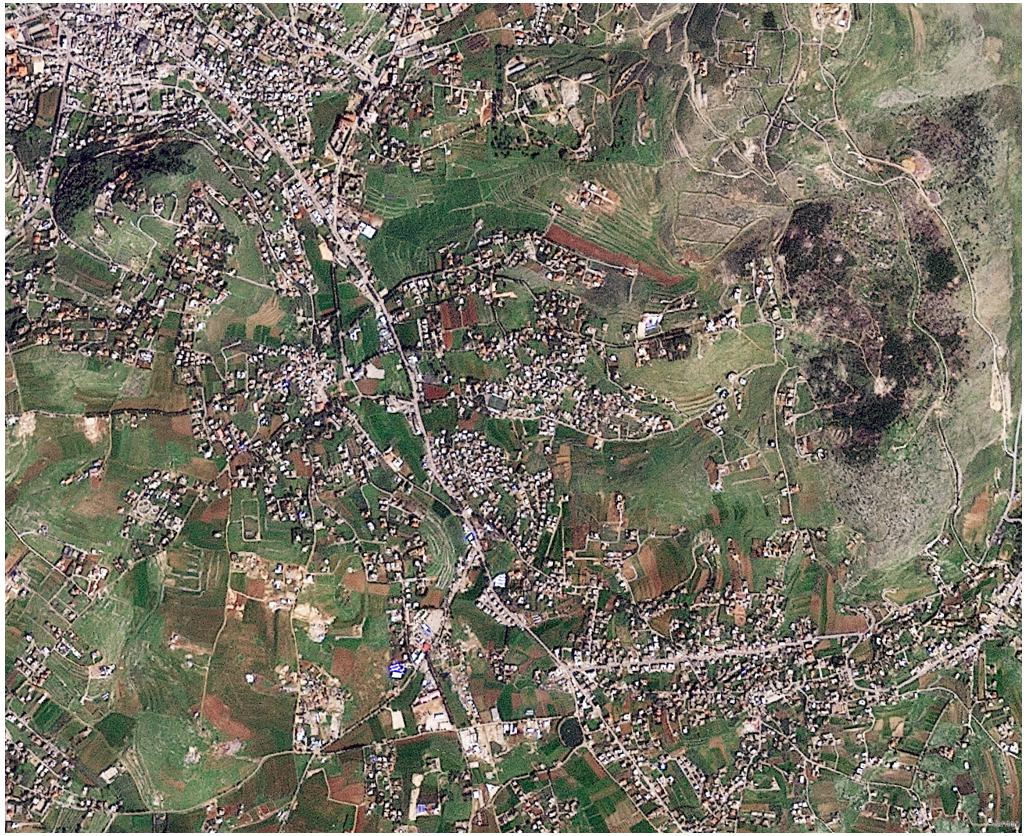
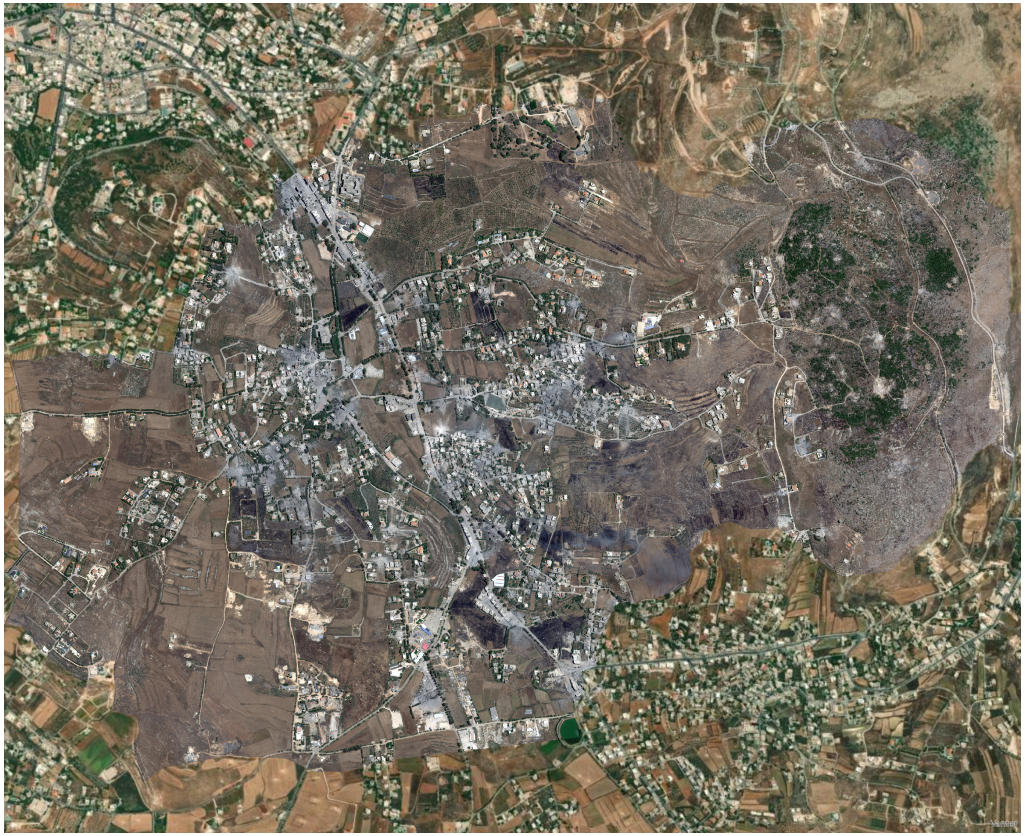
Nabatieh al-Fawqa and Ali al-Taher

28 February 2026



20 June 2026



Survey imagery is overlaid on a background map. The background outside the dated layer may come from other dates. Original composites retain a Vantor watermark; Al Jazeera credits Airbus for the dated survey imagery.

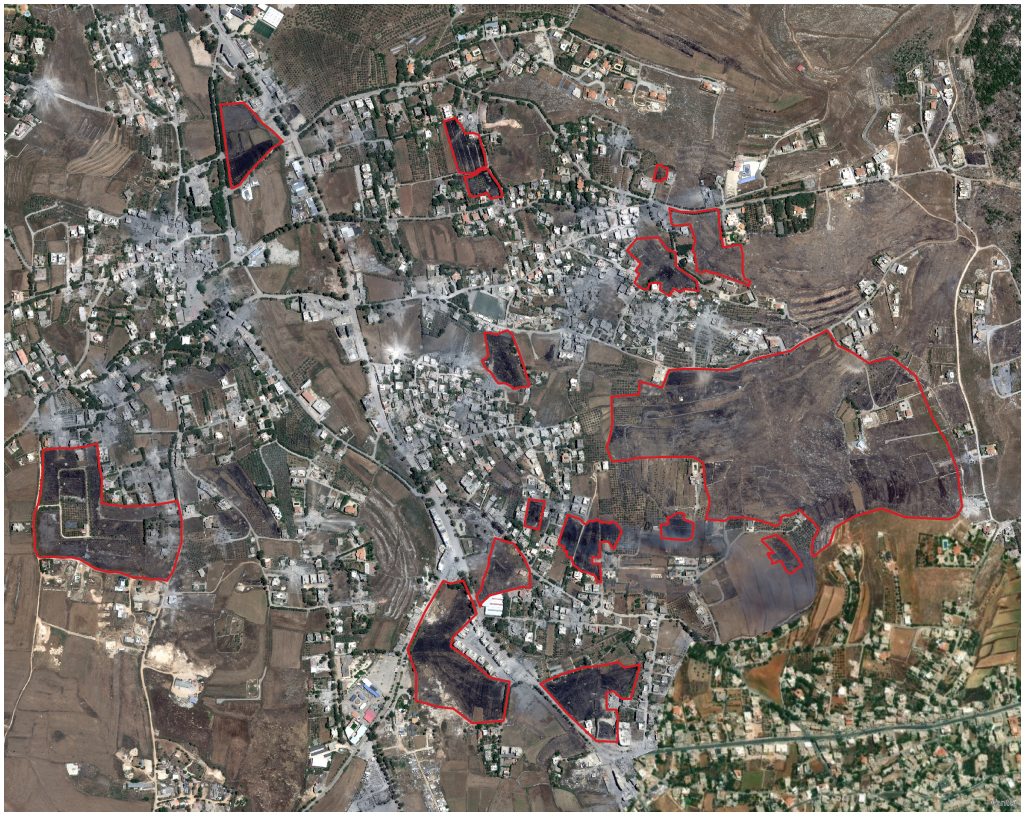
Nabatieh al-Fawqa: closer view

28 February 2026

20 June 2026



Red outlines are the publisher’s fire-area annotations. They are not boundaries of all destroyed buildings. Original composites retain a Vantor watermark; Al Jazeera credits Airbus for the dated survey imagery.

Tyre / Sour: city overview

4 January 2026

4 June 2026

Dates follow the published comparison. Original annotations and background mosaic retained; the basemap is not necessarily from the survey date.

Source: Al Jazeera; Airbus as credited by publisher.

Tyre: archaeological-site surroundings

4 January 2026

4 June 2026

Dates follow the published comparison. Original annotations and background mosaic retained; the basemap is not necessarily from the survey date.

Source: Al Jazeera; Airbus as credited by publisher.

El-Buss refugee camp, Tyre

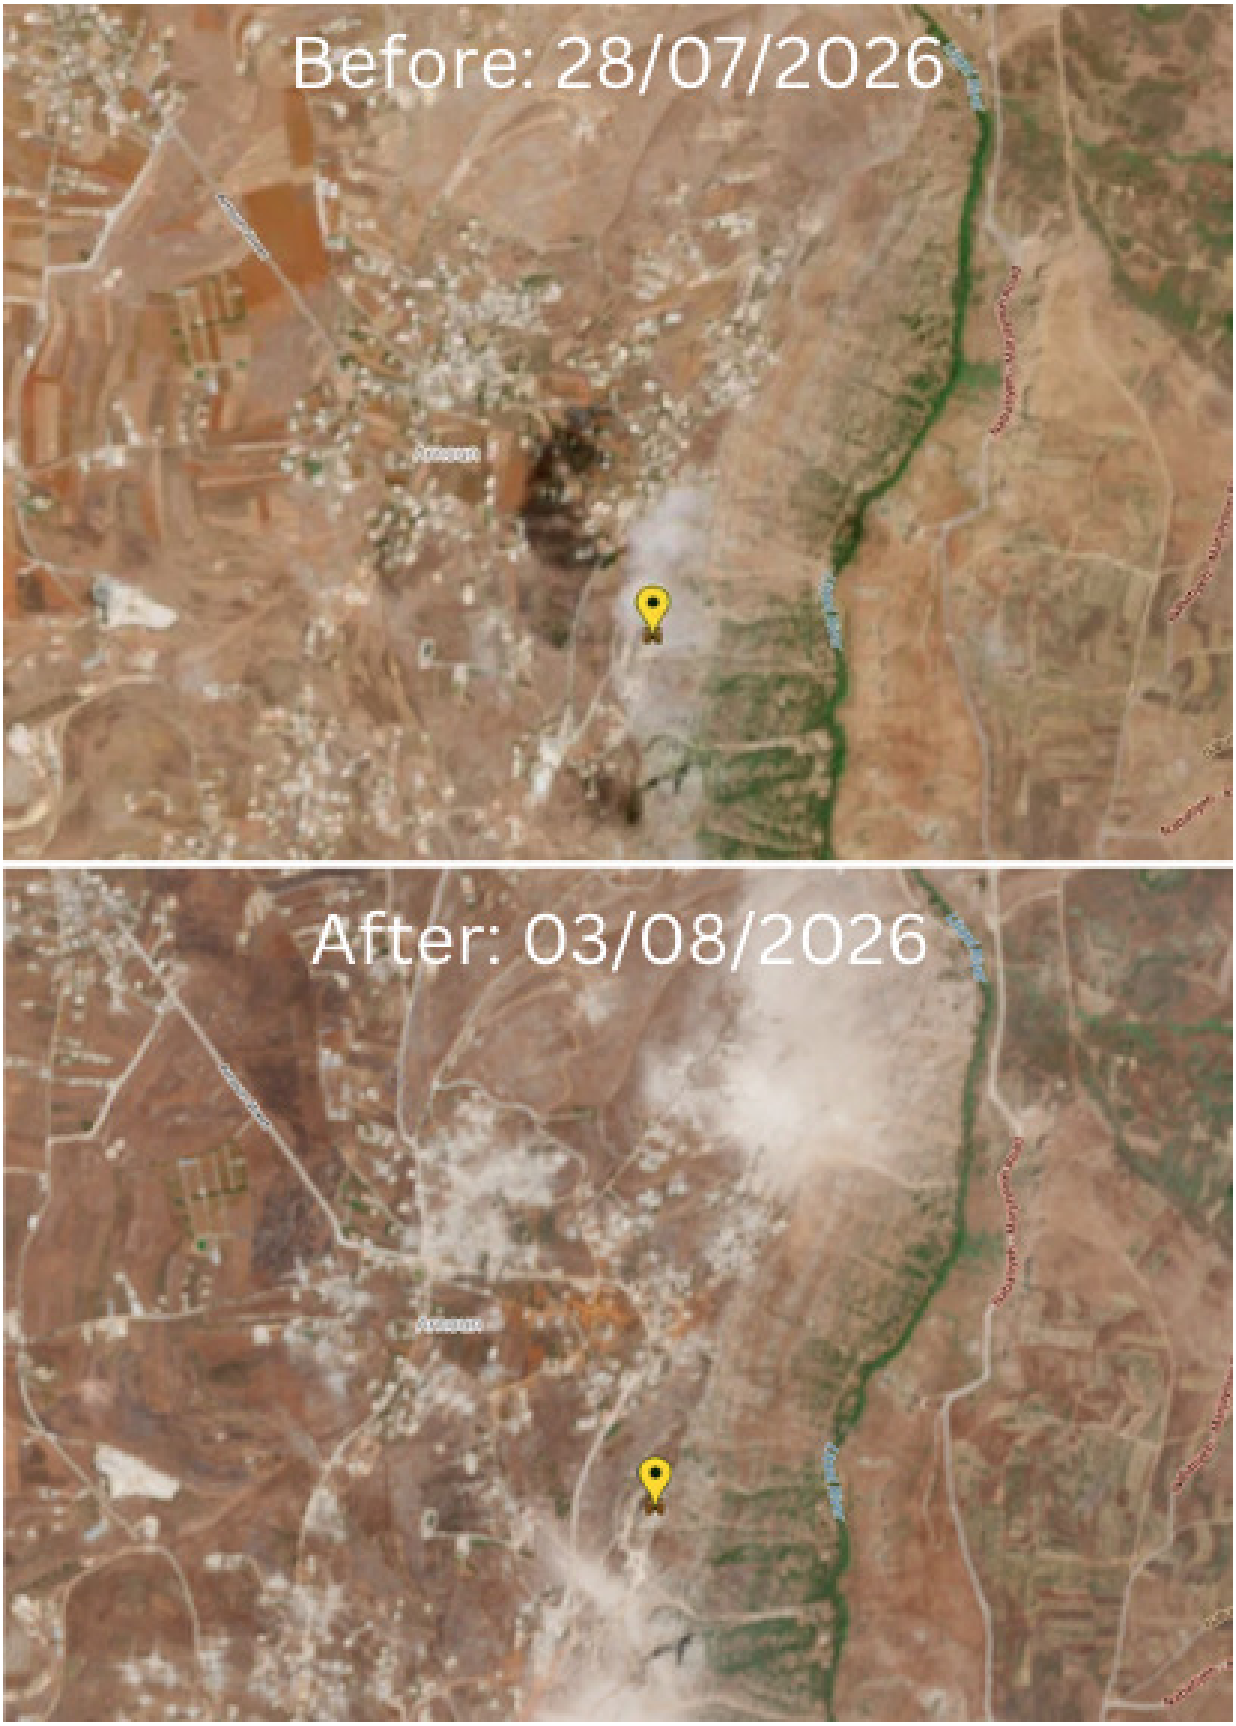
4 January 2026

4 June 2026

Dates follow the published comparison. Original annotations and background mosaic retained; the basemap is not necessarily from the survey date.

Source: Al Jazeera; Airbus as credited by publisher.

Arnoun and Beaufort Castle area



Top: 28 July 2026. Bottom: 3 August 2026. The castle marker is an orientation aid; this regional view does not establish damage to individual castle structures.

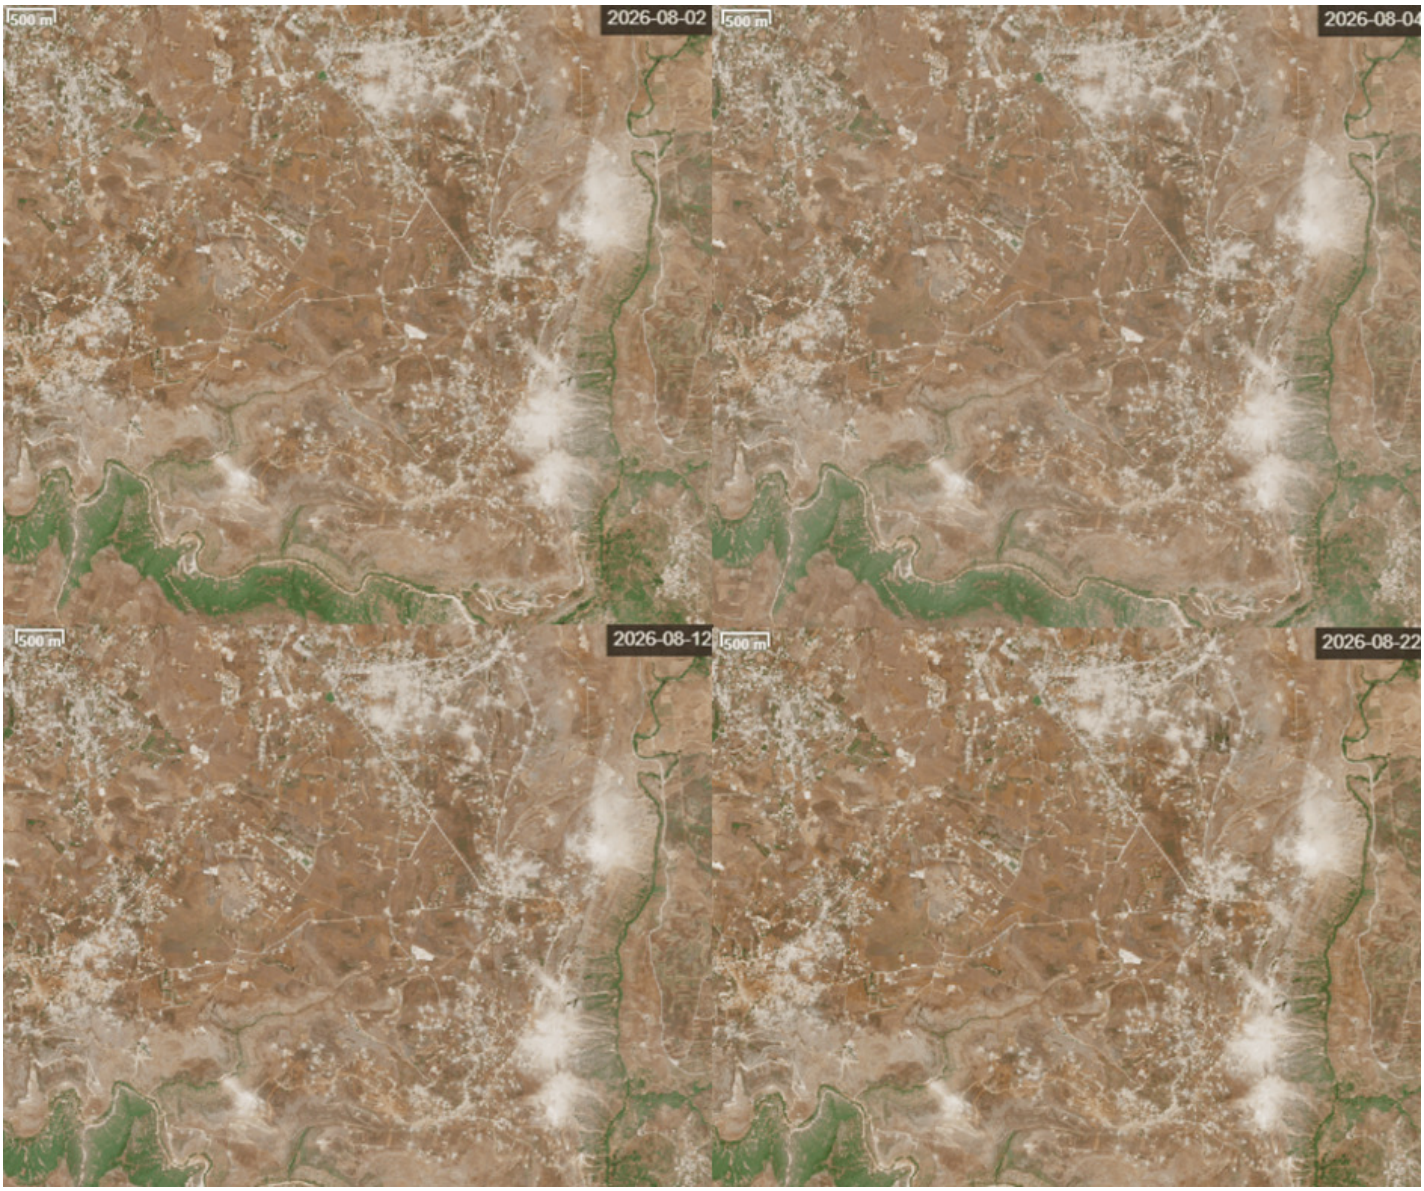
Kfar Tebnit and Safita / Yahmar area

Publisher's panel order: LEFT 28 July; RIGHT 15 July 2026. The outlined locations are Kfar Tebnit (top) and Safita (bottom). Regional imagery cannot reliably count individual destroyed buildings.

Source: Misbar, 24 August 2026; Sentinel-2 imagery.

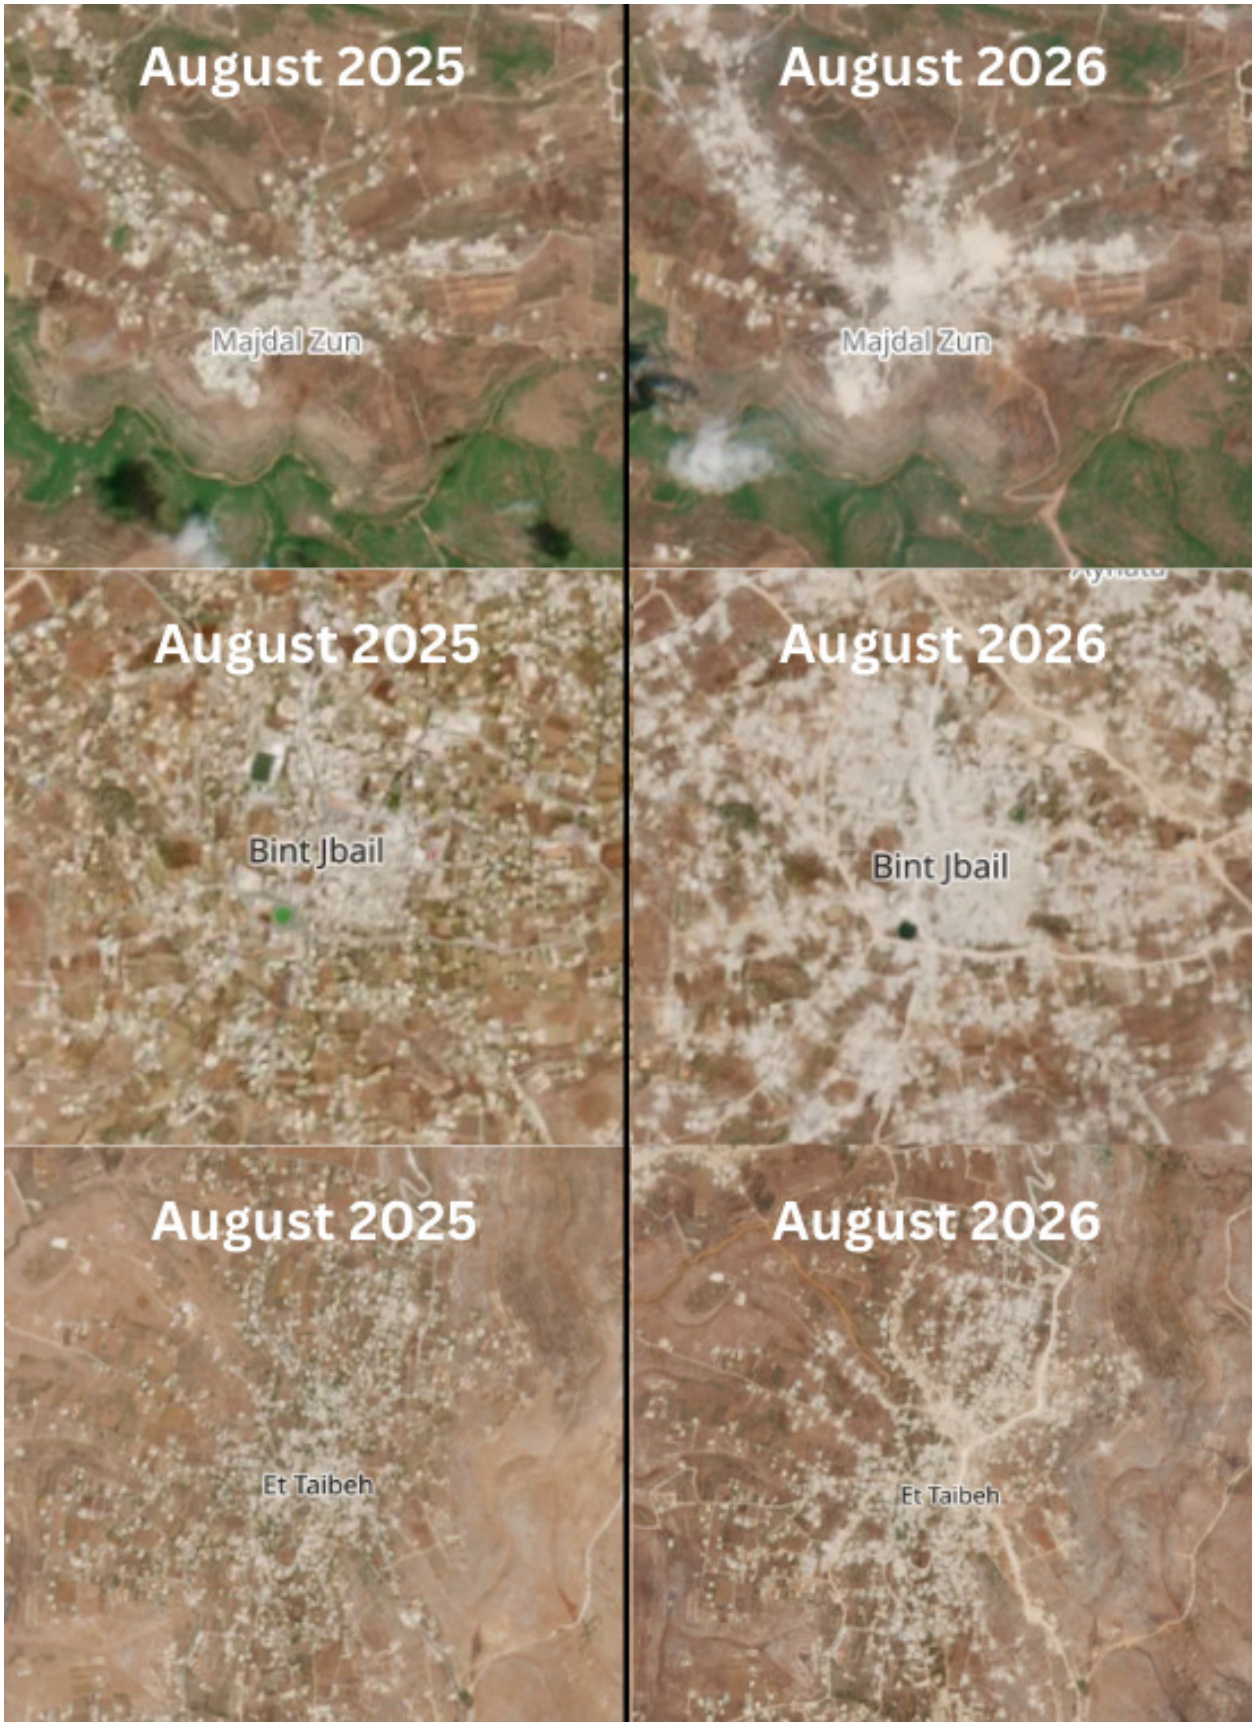
Beaufort, Arnoun and surrounding land



Four dated views: top left 2 August; top right 4 August; bottom left 12 August; bottom right 22 August 2026. Pale areas show broad surface change; they are not a measured destruction boundary.

Source: Misbar, 24 August 2026; Sentinel-2 imagery.

Majdal Zoun, Bint Jbeil and Taybeh



August 2026 views are on the RIGHT. August 2025 reference views are on the LEFT and already show damage. Rows: Majdal Zoun, Bint Jbeil, Taybeh. Individual capture days are not printed on this graphic.
